Safe-Way Choice Series Wind Load Options doors use additional interior steel reinforcements with increased hardware and springing materials and have been designed and tested to meet code requirements.

CHOICE SERIES WIND LOAD OPTIONS

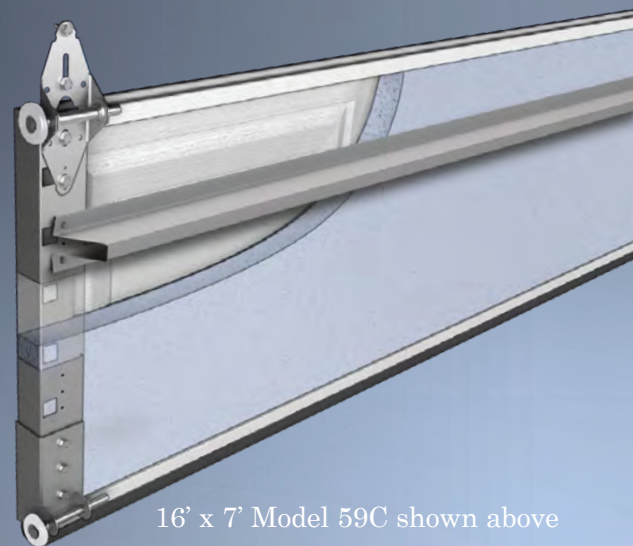

Wind Chamber Tested and Approved

Choice Series Wind Load Options doors are tested to ANSI/DASMA 108 in an approved wind chamber. Pounds per square foot (PSF) are converted to miles per hour windspeed based on ASCE standards for Safe-Way's Choice Series Wind Load Options C series of products. Testing is based on exposure category C with 30' or less of mean roof height. Design pressures are based on the required MPH windspeeds and test pressures are tested at 1.5 times the design pressure.

90 MPH	Door Size	Safe-Way "C" Products 90 MPH Design Load PSF
	9' x 7'	13.0 / -15.0
	12' x 7'	12.5 / -14.0
	16' x 7'	12.5 / -14.0
	18' x 12' 3"	12.5 / -14.0

130 MPH	Door Size	Safe-Way "G" Products 130 MPH Design Load PSF
	9' x 7'	19.9 / -22.4
	16' x 7'	19.3 / -21.6
	18' x 14'	17.5 / -19.3

140 MPH	Door Size	Safe-Way "H" Products 140 MPH Design Load PSF
	9' x 7'	23.9 / -26.1
	16' x 7'	22.9 / -25.1
18' x 14'	20.0 / -22.4
